***MANAGEMENT***

Further to several meeting held in Cairo during the previous weeks has finally started officially the cooperation between ARIDO Association of Independent Researchers Western Desert and the Sadat City University in Cairo, Facoulty of Tourism and Hotel Management.

Aim of this cooperation, strongly wished by Doctor Asaad Zaky, academic in the Sadat City University, and Mr Andrea Mariotti ARIDO Managing Director, has permitted to set a schedule of trips to El Alamein starting from December 30<sup>th</sup> 2011.

Aim of these trips will be to hold lessons of history “on site” at the Italian, German and Commonwealth war cemeteries, located along the international road heading from Alexandria to Marsa Matruh.

Moreover will be held lessons at the forgotten cemeteries locations inside the desert of El Alamein found by ARIDO’s researchers.

The above to give to the students of Doctor Asaad Zaky a complete picture of the historical events happened over there.

Researching, discovery as well as the teaching to singles and groups of people committed to our missions and trips is the Paramount and binding aim of ARIDO which, because of its great knowledge of the historical sites, of the heroic and of the every day events of who fought in North Africa and more in detail of the history of those places, makes the difference between the simple and cold history that is often taught and the great value of a educational and formative method.

In order to permit that this initiative ( teaching and educational missions entirely managed by ARIDO EGYPT) could keep on working by the time, we have been studying and is going to be signed a partnership and a formal agreement between the SADAT CITY UNIVERSITY – CAIRO and ARIDO EGYPT

So far have been confirmed No 2 missions per month up to May 31<sup>st</sup> 2012 (10 in total) and a general one, that will be organized on the period March/april 2012 in the desert of El Alamein. For this mission will be committed up to 60 students and 8 teachers.

A fellowship and partnership, by now, well established.

Teaching "on site" means study, being prepared and devotion, things that the people of the Association of Independent Researchers Western Desert can transfer to the students by communication skills assisting qualified teachers such as Doctor Asaad Zaky

Students follow the lesson "on site" that is proceeding inside the Italian War Cemetery of El Alamein

Questions and tips from singles after the lesson are replied in real time.

*A day of lesson at El Alamein can head to the end only inside the legendary QUOTA 33, where students spent almost one hour listening to Doctor Asaad Zaky who, assisted by Mr Andrea Mariotti, has explained what have been the life and the work of Paolo Caccia Dominioni.*

Mr Andrea Mariotti translate for the students the Italian text of a newspaper, dated September 30<sup>th</sup> 1950, exhibited inside one of the cabinets at QUOTA 33

Unfailing last picture before leaving the Italian War Cemetery at the end of a fruitful and interesting day of learning “on site” for these young guys and girls: future touristic guides.
